

Second Annual NC State University Aquatic Sciences Day Camp

What: A day of fun and learning focused on activities and hands-on experience with aquatic ecology, fisheries, aquaculture, and aquatic animal health. Participating students will also explore career opportunities and degree options at NC State.

Target Audience: Accomplished, motivated high school students (preferably sophomores and juniors) interested in pursuing a career in aquatic ecology, fish biology, aquaculture, conservation biology, veterinary medicine, fisheries management, or a related field.

Benefits: This day camp will be taught by NC State University professors and graduate students actively engaged in research and teaching. NCSU boasts Top Five programs in both Fisheries and Veterinary Medicine. Participating students will receive hands-on experience and training that will help identify career paths, make contacts in the scientific community, and build credentials for a future application to NC State.

See: Last year's fun: <http://cnr.ncsu.edu/fer/fishwild/aquatics.html>

Application Process: Deserving students should be nominated by a high school science teacher, (one student per teacher), parent, or adult mentor and directed to the following website, where students will complete the application: <http://cnr.ncsu.edu/fer/fishwild/aquatics.html>

Dates: Online application must be submitted by **February 1, 2011**.
Camp is Saturday, April 2, 2011, NCSU Campus (details to follow).

Cost: \$30.00, which includes lunch and a t-shirt. Payment will be accepted following the approval process.
